EXPERIENCING HAIR LOSS?
Regenera Activa can help you

Hair loss can be a frustrating experience, whether you're a man or a woman. It affects millions of people worldwide, and it's normal to feel concerned when you notice your hair thinning or falling out more than usual.

Fortunately, there's a solution that works naturally with your body:

Regenera Activa, a minimally invasive treatment designed to stop hair loss and promote healthy hair regrowth.

WHAT IS ANDROGENETIC ALOPECIA?

Androgenetic Alopecia (AGA), commonly known as male or female pattern baldness, is the **most common cause of hair loss**. It is characterized by an excessive activity of the hormone androgens, specifically **dihydrotestosterone (DHT)**, which disrupts the normal hair growth cycle, leading the **hair miniaturization** and a noticeable **decrease in hair density**.

While it's normal to lose some hair every day, AGA accelerates this process, making it harder for new hair to grow back. Over time, you may notice:

THINNING HAIR | PREMATURE HAIR LOSS | REDUCED HAIR DENSITY

Regenera Activa AMT

How to identify that you are getting a Regenera Activa procedure?

EUROPEAN PATENTED RIGENERA TECHNOLOGY

There are many products on the market to treat androgenetic alopecia, but only one treatment uses the patented Rigenera® technology to obtain autologous and tissue-specific micrografts, which is safe and has scientifically proven results.

Make sure to get the original Regenera Activa procedure!

1. Ensure the product box is sealed.
2. Check the labeling.
3. Blister opened in front of you.
4. Look for the "Rigenera" logo on the lid.

HAVING SOME QUESTIONS ABOUT REGENERA ACTIVA?

How does it work?
A tiny tissue sample (about a rice grain) is taken, processed, and reinjected to regenerate hair follicles and promote growth.

Can I combine it with other treatments?
Absolutely! You can combine it with treatments like Minoxidil, Finasteride, or PRP to boost results. However, PRP should not be applied in the same session.

How many sessions do I need?
Usually, just one! However, in some cases, a doctor might recommend maintenance sessions.

When will I see results?
Most people start noticing results around the third month, but regeneration begins even earlier.

Is it safe?
Yes! Since we use your own biological components, there's no risk of rejection.

Is the procedure painful?
Not really! We use local anesthesia, so you'll feel minimal discomfort.

INTRODUCING REGENERA ACTIVA
A Revolutionary Hair Loss Treatment

Regenera Activa is an **advanced regenerative procedure** to treat androgenetic alopecia.

In just one session, this treatment can **stop hair loss** and help regenerate the affected area, using your body's own biological tissue.

PATIENTS OWN TISSUE CELLS

NO SURGERY REQUIRED

RESULTS IN JUST 1 SESSION

FOR MEN AND WOMEN

90% SUCCESSFUL RATE

MAXIMUM SAFETY BY USING CERTIFIED MEDICAL DEVICES

MORE THAN **450.000** SUCCESSFUL CASES

CLINICALLY PROVEN

MORE THAN **10 YEARS** IN THE MARKET

RegeneraActivaAMT

Here's how it works:

DIAGNOSE — EXTRACTION — PROCESSING — INFILTRATION

The procedure takes **less than an hour**, is **minimally invasive**, and requires **no downtime**, so you can return to your normal activities immediately.

KEY BENEFITS

MINIMALLY INVASIVE
No surgery or downtime required.

NATURAL & SAFE
Uses your own tissue, so there's no risk of rejection.

CLINICALLY PROVEN
Results you can trust, backed by more than 80 scientific studies.

QUICK RESULTS
See visible improvements within 3 months.

WHAT CAN YOU EXPECT FROM THE TREATMENT?

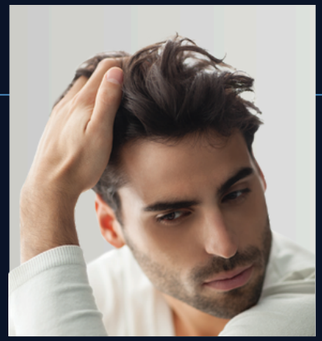

After 3 months, the treatment stops the progression and starts to reverse it.

- Stop hair loss
- Stop hair miniaturization
- Increase hair thickness and quality
- Increase hair density
- Prevent hair loss progression
- Delay the need of hair transplant
- Maintain hair transplanted follicles

RegeneraActivaAMT
